

DREAMS *in the City*

2020 Dare to Dream Honorees

The Goldberg Family - Amanda, Marc and Denise Goldberg's Famous Bagels

Amanda Goldberg was diagnosed with Type 1 Diabetes at the age of nine. Like many newly diagnosed families, The Goldbergs began their journey unaware of where to start in their efforts to manage the disease and fight for a cure.

The Goldberg's involvement with the Diabetes Research Institute Foundation (DRIF) dates back to Amanda's involvement as a 'Diabetes Diplomat'. She has volunteered her time, skills and passion to help others, while raising funds to help the Diabetes Research Institute to find a cure through peer to peer fundraisers and events. She currently

serves on the DREAMS in the City Young Professionals' Committee.

The Goldberg Family has continued to reach out to newly diagnosed families to share their story, provide support and act as a resource. They remember all too well the shock of Amanda's diagnosis at nine and the immediate challenge for their family to manage life with T1D. Their role as a support and resource in the T1D community has helped many as they navigate day to day living and beyond. Amanda is a true ambassador to the T1D community and her vision as to how to make a positive impact towards our mission has only continued to grow. She proudly wears her pump and is always looking to help out and introduce herself to anyone the shares and understands this experience.
